

Australian Synchrotron

Research Forum and Workshop

QUEENSLAND

Please join us for a showcase of outstanding research by Queensland scientists that has been facilitated by the Australian Synchrotron and the International Access Program. The forum will also highlight the capabilities afforded by ANSTO's Australian Centre for Neutron Scattering (ACNS).

by **3rd of October 2017**

PROGRAM

The event will contain a series of talks that highlight capabilities and showcase outcomes in a range of disciplines and applications including: chemistry and surface science, structural biology and life sciences, earth and environmental science, advanced materials, industrial applications and medical imaging. In addition, the event will provide opportunities for Q and A and networking with facilities staff and long-term synchrotron users from across Queensland.

For more information go to bit.ly/SynchrotronForum17 or contact Assoc Prof Kevin Jack (k.jack@uq.edu.au).
